

Fraxion™

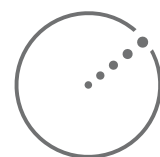

Patient-specific cranial immobilization

What is Fraxion™ ?

Accuracy and precision in patient positioning is a must when delivering safe and effective cranial radiation therapy. The key is having a single solution for immobilization which allows you to choose the technique best suited for your patient. Fraxion™ is the first to introduce an innovative solution which brings all the proven immobilization options into one single solution. This allows immobilization to be tailored to patients' needs using one system, providing individual assurance.

Why Fraxion™ ?

- Built upon 60 years of leadership in stereotaxy
- Frame-based and frameless solution
- Choice of immobilization
- Accuracy and precision for SRT and SRS
- Simple design for optimized treatment workflow
- Interface to Leksell® Coordinate Frame G for SRS

ELEKTA

How can Fraxion meet the needs of each individual patient?

Unique Vacuum Mouthpiece

The patient-specific vacuum mouthpiece and head cushion provides non-invasive accurate and comfortable patient immobilization.

Thermoplastic Mask Immobilization

The partial and full head thermoplastic masks provide alternative immobilization options in non-invasive setup, without compromising on accuracy.

Thermoplastic Mask & Mouthpiece Combination

The thermoplastic mask can be used in combination with the vacuum mouthpiece to provide flexibility in set-up options, allowing optimal set-up to best fit the patient's needs.

Target Positioner

The target positioner provides accurate target localization for stereotactic planning, imaging and treatment.
